Android Developer | Software Engineer | Problem Lover

SUMMARY

I'm a lover of good design and strive to make my software clean, clear, well-documented and easily maintainable. I'm easy-going, fun, dedicated, and work well in teams (in both lead and follow roles).

- Emmy-nominated in 2017 for E!News/Android 360/immersive experience
- My apps guide guests in museums around the world
- Frequently tapped to curate products out the door and liaise with clients
- Known for writing maintainable code

PERSONALITY

I bought my first computer with paper route earnings, then taught myself to program at 13

I provided Internet email service for free to my BBS users in 1993, long before most had heard of email
